

IOBED - Integrating OBSEA's Biodiversity data into EMODnet Biology

Second DTO-BioFlow Data Grats Holders Workshop

Enoc Martínez
Oriol Prat
UPC

3rd June, Paris

OBSEA Seafloor Observatory

- Underwater cabled observatory
- Located at NW Mediterranean Sea
- Shallow waters (20 m depth)
- Multiparametric Observatory

Ecosystem Monitoring

- Multiple cameras deployed
- Image archive since 2011
- Fish abundance & behaviour studies
- Image analysis time-consuming!

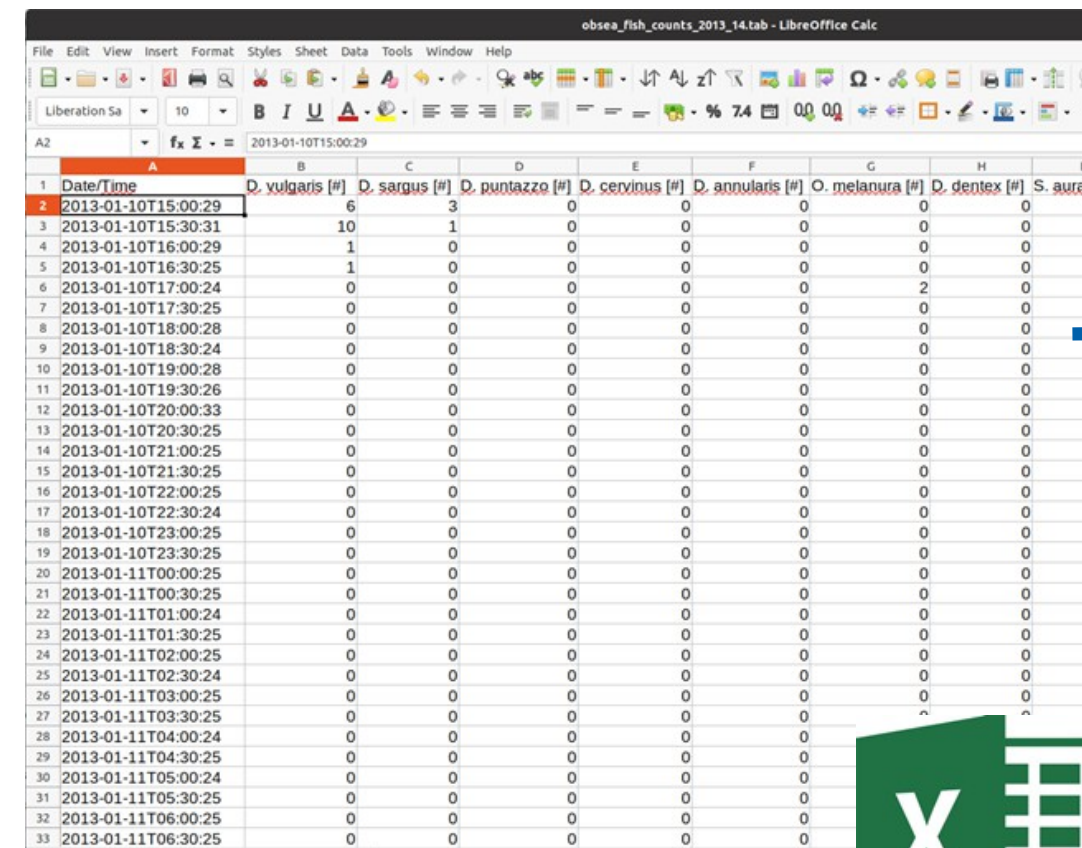

Traditional Ecological Monitoring

Underwater pictures

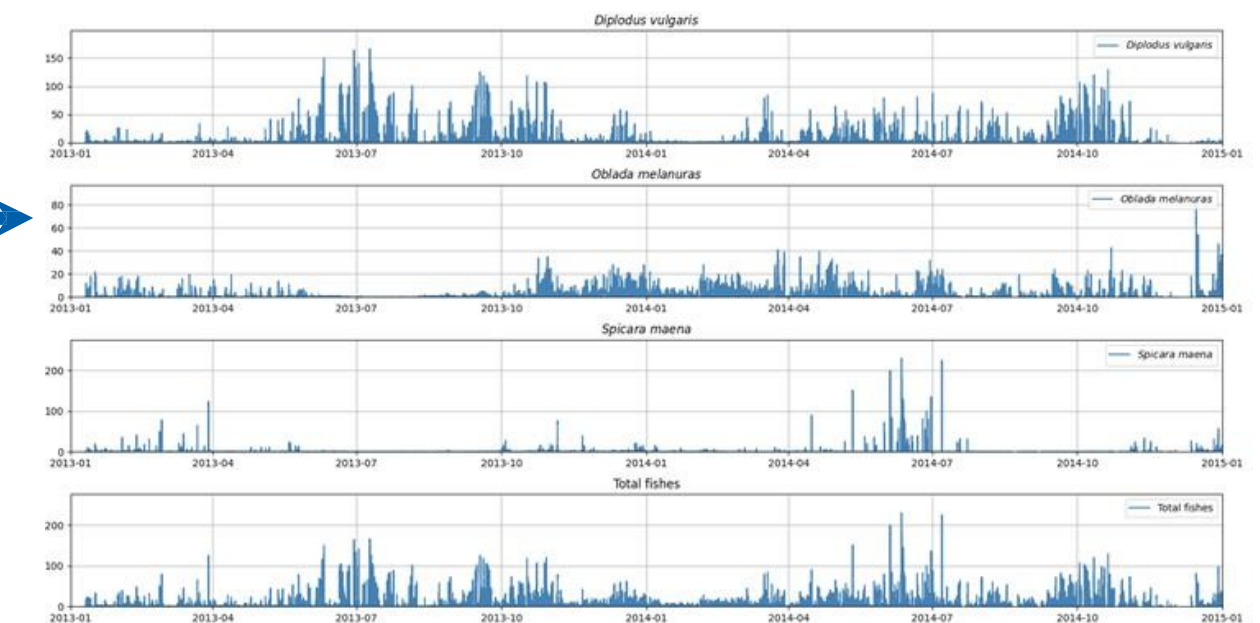

Manual fish counts

Ecological Monitoring at OBSEA

- Long-term ecological monitoring
- Imagery data archive since 2009:
 - Low quality pictures from 2009 to 2023
 - HD cameras from 2023 to now
- Analysis of HD cameras 2023-2025
- more data coming soon...

Get the data!

Biodiversity Time Series: Slagreef

Slagreef Project

- Project to produce 3D printed artificial reefs
- Reuse waste from the steel industry (slag)
- Ecosystem and shoreline protection
- AI-monitoring to assess its ecological impact

Get the data!

- Aetomylaeus bovinus
- Chromis chromis
- Coris julis
- Dentex dentex
- Diplodus cervinus
- Diplodus puntazzo
- Diplodus sargus
- Diplodus vulgaris
- Epinephelus costae
- Epinephelus marginatus
- Mullus surmuletus
- Muraena helena
- Oblada melanurus
- Parablennius gattorugine
- Sarpa salpa
- Seriola dumerili
- Serranus cabrilla
- Sparus aurata
- Symphodus mediterraneus

Dolphin Carcass Experiments

Carcass of a stranded dolphin

- Deployed in a known environment (OBSEA)
- Scientific objectives:
 - Ecological changes by mammal carcass fall
 - Determine species with scavenging behaviour
- Experiments monitored with AI
 - March-July 2023 May-July 2024

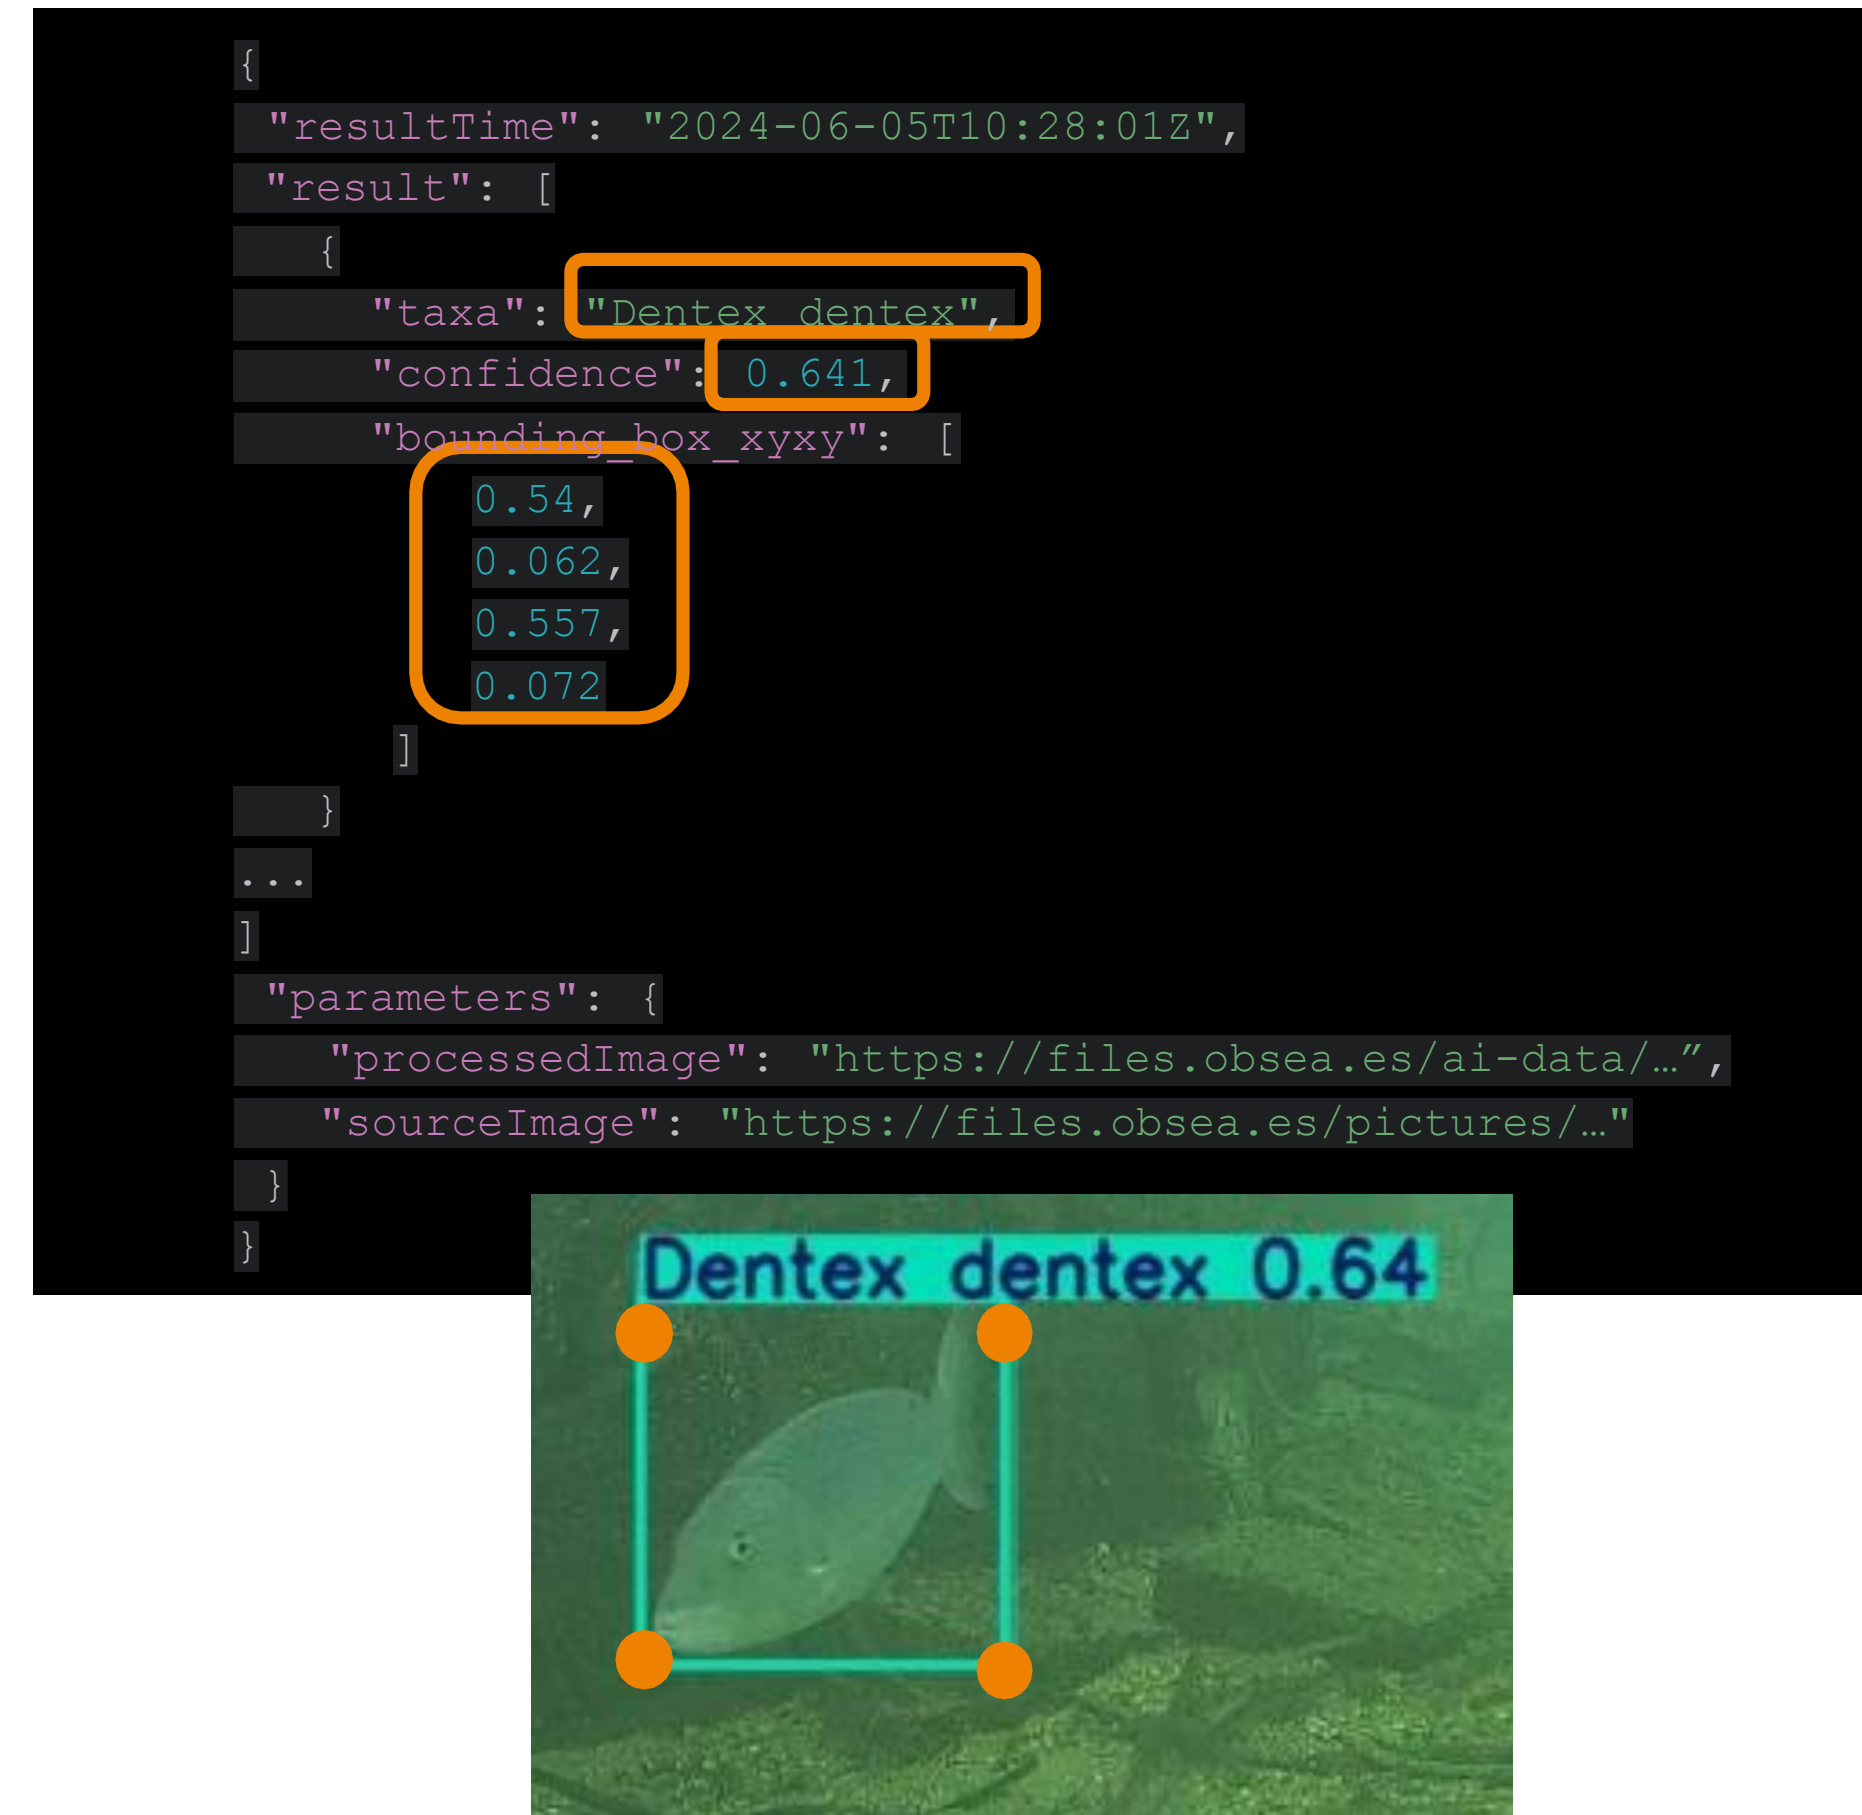

Get the data!

M2M Real-time Data Access

OBISEA AI e-Infrastructure

- API for machine-to-machine interactions:
 - Pictures (source / processed)
 - AI predictions
- Queries available for species / picture
- Standard technologies:
 - SensorThings API / NGINX
- Datasets periodically exported to Zenodo

Thank you for your attention!
